

Get Fliq!

A faster and easier way to share

From Mark/Space – The Sync Experts

Fliq is a family of powerful applications for iPhone, iPod touch, Mac and Windows PC that provides cool, fast and easy ways to share your contacts, photos, notes and tasks with others over a Wi-Fi network.

- At home, at a friend's, in a cafe and wherever else there is a shared network, you can send and receive stuff - like pictures, to do items, memos and contacts - with anyone.
- At work, share contacts, tasks and documents more efficiently with co-workers. Increase productivity and have more fun while doing it.
- At a sports arena, on campus, in an airport or at the mall, exchange notes and pictures easily and quickly with anyone. Snap a photo with your phone and in a couple of taps, send it off to people on your list.
- Get together with people you know, make new friends and discover your own ways to get the most out of Fliq for whatever you do and wherever you go.

Fliq For Macs and PCs

The Mac and Windows PC versions of Fliq are powerful, full-featured applications that run seamlessly on your desktop or laptop so that you can access all Fliq apps' features from one program.

All versions of Fliq are compatible with one another. That means that you can send yourself information from your computer, iPhone or iPod touch, and vice versa.

Learn more about  GetFliq.com

- Send and receive contacts, photos, notes and tasks over a network.
- Create, edit, categorize, prioritize, save, search, sort and share contacts, notes and tasks.
